

PLATINUMPLUS HOME AIR PURIFICATION SYSTEM

The PlatinumPLUS Home Air Purification System from SecureAire is the Only Complete Air Purification System made specifically for your home. The PlatinumPLUS Home System has been recently redesigned for ease of installation and filter cartridge changeouts. SecureAire's ACTIVE Particle Control™ (APC) continues to be at the heart of the system ensuring every aspect of indoor air pollution is addressed: removing airborne particulates, dangerous pathogens, smoke, and toxic VOCs (volatile organic compounds).

New one-piece housing design provides PlatinumPLUS product improvements:

- Simplified System installation with one piece removal for cabinet mounting.
- Integral System Grids eliminate the need for separate grid removal.
- Integral System eliminates face plate removal via screws.
- Unique design guarantees correct system air flow direction.
- Reduced system weight (nearly 30%) allows for easier installation.
- Secure Snaps™ ensure no filter cartridge bypass.
- Secure Snaps™ offer more reliable and energy efficient connections.
- MERV rating efficiencies maintained with improved ACTIVE Particle Control (APC) characteristics.

Double your net profits by providing an IAQ solution that works and is what your customers want and need.

Protect your customers and their families by providing the Safest, Healthiest and Cleanest Indoor Air Possible.
