

DuraPlus® & DuraTech® Support Boxes

DuraVent is proud to announce an improved version of our Round Ceiling Support Box and Flat Ceiling Support Box!

The added height of this support box will make your install easier than ever.

The round ceiling support box creates a positive connection between the support box and chimney with a built-in twist lock connection. An adapter is needed to connect DVL or DuraBlack to the support box.

Trim collars are sold separately.

Round Ceiling Support
