AIR CONDITIONING WINTER COVERS

////////////////////////////////////

HOW TO USE THE WINTER COVERS CATALOG

Replacement Components offers various brands of winter covers for condensing units including Carrier, Bryant, Payne, and Totaline.

WHAT COVER IS RIGHT FOR ME?

- Carrier, Bryant, and Payne Winter Covers are custom designed for your Carrier, Bryant, and Payne condensing models
- Totaline Winter Covers are designed for all brands of condensing units and can select based on your unit's dimensions

CARRIER, BRYANT, AND PAYNE WINTER COVERS

These winter covers are made with the latest Innerflow technology; custom for Carrier, Bryant, and Payne models. The guide in the catalog will allow you to select the right winter cover by finding the correct brand and model number of your unit.

Features:

- Highly durable PVC material
- UV protection, anti-cold crack fire retardant, mildew and fungus free
- Allows air to move through the covered condensing unit while preventing moisture from getting it to damage the unit

TOTALINE WINTER COVERS

Winter covers made for all brands of equipment. The guide in the catalog will allow you to easily select the right cover based on the dimensions of your condensing unit; regardless of brand.

Features:

- Designed with vinyl fabric with a reinforced cloth backing
- Cross ventilation to remove condensation and protecting your unit
- Protects against mold, mildew, fungus, UV, and sub-zero temperatures

CARRIER®, BRYANT®, AND PAYNE® WINTER COVERS

Innerflow™ Air Conditioning Covers are engineered to give your outdoor unit complete weather protection.

Innerflow™ Unit Cover **Features**

- Protects unit from top to bottom
- Removes damaging condensation
- Anti-cold crack material
- UV protected
- Fire retardant
- Mildew and fungus free
- 10 year Limited Warranty

Why should I cover my air conditioner?

Throughout North America, a vast majority of people are covering their outdoor air conditioning units for a variety of reasons. Typically, air conditioners are covered during the fall, winter and early spring, to protect them from the elements and environment. Acid rain, harsh weather, ultraviolet rays, flying debris, ice, snow, blowing leaves, dust etc. must be protected against.

Introducing The Innerflow™ System

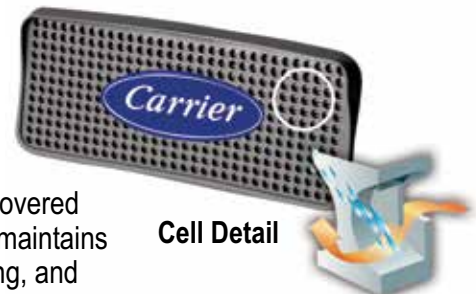

The Innerflow™ System is molded from a highly durable PVC material, attached to our custom-made covers. This specially engineered section allows air to move freely throughout the covered air conditioning unit, yet prevents rain and snow from entering, keeping it dry and free of damaging condensation.

How does it work?

In the fall, winter, and early spring, a sunny day can significantly raise the temperature inside a covered air conditioning unit, as the cover absorbs the sun's radiant heat. This temperature variance between the interior of the covered unit and the outside ambient temperature generates a condensation build-up. Unlike conventional covers that trap this warm condensing air, the Innerflow™ System allows air to flow out of the covered unit, taking with it stale air and moisture. In addition, the Innerflow™ System effectively maintains a balance between the relative humidity inside and outside of the cover, thereby reducing, and even preventing, the formation of rust.

Top Quality Vinyl

The Innerflow™ covers are made only from the highest quality materials, carrying with it strict standards. Superior features such as UV protection, anti-cold crack fire retardant, mildew and fungus free gives this cover complete weather protection.

TOTALINE® UNIVERSAL WINTER COVERS

WINTER COVERS TO FIT ALL BRANDS OF EQUIPMENT

Totaline Premium Vented Covers

have two plastic air vents that provide maximum cross ventilation. Incoming air is deflected throughout the entire condensing unit removing any condensation.

MORE EFFICIENT

Our cross-ventilated cover integrates principals of physics to increase the amount of air transfer through cross ventilation and airflow dynamics. The advanced engineered design reduces air friction and funnels air inside the cover creating optimal ventilation.

OPTIMAL AIR FLOW

All Totaline covers are purposely designed to be ½” short to facilitate the movement of air at the bottom of the cabinet where the cold damp air accumulates.

UNIQUE AIR VENTS

Our cross ventilated covers provides airflow through louvered vents to provide less resistance and more unrestricted flow of air. Single vents allow restricted airflow, similar to blowing into a bottle – not much air is displaced.

- Protects against snow, ice, UV fading, mold, mildew, rusting, leaves, dirt and debris.
- Reduces maintenance costs and improves efficiency.
- Prolongs the life of condensing unit and reduces cabinet fading.
- Premium 18 oz. industrial vinyl fabric with a reinforced cloth backing. Gray or beige color.
- Tailored to fit the exact shape of cabinet – we have over 10,000 condensing unit models on file.
- Precision opening to fit electrical and refrigeration lines with convenient hook-and-loop closure.
- Material is specially treated against mold, mildew, fungus, UV and sub-zero temperatures.
