

MODULAR WALL VENT TUBE CONFIGURATIONS

MODEL #MWV6KIT

FOR USE

- Wall intake/exhaust applications
- Kitchen, bath or dryer exhaust
- Devices that require intake such as HRV and ERV systems
- Fresh air make-up

MATERIALS

- Quality constructed from High Density Polyethylene polymer material
- Comes in black, with a lightly textured matte finish on the hood
- UV stabilized and resistant to impact

FEATURES

- Modular design comes in one complete kit with interchangeable screens, dampers, j-channels, flange and duct adapter to fit 4", 5" and 6" applications
- Adapter has raised tabs to help ensure a good connection to ducting
- J-Channel insert has notches that click into place allowing for a variety of heights
- The J-Channel can accommodate 7/8" when fully nested, or up to 1-1/2" siding when extended to the full length

BENEFITS

- Replaces up to 30 SKUs in one kit
- J-Channel allows termination of exterior siding, brick or stone to the duct flange while still providing enough overlap to ensure a good seal
- Adapter fits 4" 5" and 6" ducts, facilitating a uniform look for all wall-mounted intake/exhaust vents
- Screen and damper can be removed, making cleaning and servicing easier without having to damage exterior surfaces

CONFIGURATION	CFM	MAX VELOCITY FT/MIN	FREE AREA SQ. IN.
6" No Screen	245	1250	26.9
6" Standard Screen	245	1250	23
6" Micro Screen	245	1250	15
5" No Screen	170	1250	17.9
5" Standard Screen	170	1250	17.9
5" Micro Screen	170	1250	15
4" No Screen	109	1250	11
4" Standard Screen	109	1250	11
4" Micro Screen	109	1250	11
