

T3 Test Kit 63600

- Instant testing for major parameters affecting water quality.
- Simple color charts for measuring concentrations
- Suitable for use with all hydronic heating systems
- Each vial contains 25 individual test strips

The T3 test kit is a convenient, easy to use method to test your water quality at the job site. Dedicated dip test strips determine Fernox Protector F1 concentration levels, pH, and total hardness (grains per gallon) in the system water.

Application

All tests are suitable for use with fill water and hydronic system water containing Fernox Protectors. Test strips are provided for Fernox Protectors, pH and total hardness (grains per gallon). The test methods are simple to understand and easy to use and do not require any formal training. The results are delivered in seconds and provide vital insight and help to determine the correct course of action for optimum system protection.

Package, Handling & Safety

The T3 Test Kit comprises of three vials containing Express Inhibitor Test strips (Fernox Protector Test), pH test strips and Total Hardness test strips, supplied in an environmentally friendly cardboard box.
