2257-20

What's Included

- (1) 102 x 77 Spot Infrared Imager (2257-20)
- (1) 9V Battery

Where to Buy

- ☐ Shop Online
- ☐ Find Local

Quickly diagnosis the problem. With instant start-up for scanning large areas and the ability to give high resolution images with precise single spot measurements, the new Imager is ideal for fast and accurate troubleshooting. Exclusive DUAL SENSE™ technology allows the Imager to individually optimize pixels to eliminate the blurring of hot and cold details in complex environments. Equipped with 56:1 distance to spot performance, a 15-second image hold, and a temperature range of 14°F – 626°F, users are able to scan, target, and see a single on-screen temperature reading from long distance or from up close. Backed by a 5-year warranty, the 102x77 Spot Infrared Imager confirms Milwaukee’s continued commitment to delivering solutions that save time and increase productivity for its users.

Features

- Go straight to work with Instant Start-Up
- DUAL SENSE™ pixels are ultra-responsive, adjusting individually to eliminate blurring of hot and cold areas
- Take temperature measurements from long range or up close with 56:1 distance-to-spot performance
