PREFERRED™ SERIES DUCTLESS HEAT PUMPS

The Coolest Thing in Comfort

Models: 38MARB, 38MGRB,
38MGHB, 38MBRC

WHY ARE SO MANY HOMEOWNERS GOING DUCTLESS?

Ductless systems are becoming an increasingly popular HVAC choice in homes across the U.S. Why? They use the same process as traditional HVAC to heat and cool your home—just without the ductwork. Often called “mini-splits,” these systems work by connecting a single outdoor unit to one or more indoor units through flexible refrigerant tubing. So they’re simple to install just about anywhere. And because ductless units are placed directly in the room, they offer precise temperature control, better energy efficiency and cost-effective comfort year-round.

Comfort Technology

Bryant® ductless systems use inverter technology—which continually adjusts the compressor speed as conditions change—for consistent comfort with lower energy usage. Plus, enjoy year-round comfort with a system that offers dependable performance in temperatures from -22° F to 122° F.*

Efficiency

Our ductless systems provide improved temperature regulation and increased energy and cost savings. Our Preferred Series units deliver up to 28.1 SEER2 and 13.6 HSPF2 ratings. And with ENERGY STAR® certifications on a number of ductless models, we have one of the highest efficiency ratings in the world.

Air Quality

Breathe easier with enhanced indoor air quality. Our built-in reusable filters (available in all indoor units) effectively remove odors, allergens and pollutants—for cleaner, fresher air and lower maintenance costs. Just pull them out, rinse them off and replace.

Personalized Comfort

Connect up to five indoor units to a single outdoor unit—to deliver individualized temperature control in every room of your home. Once you decide what temperature you’d like a specific zone (or room) to be, the system will quietly maintain that temperature.

Whisper Quiet Operation

Ultra-quiet operation reduces noise pollution both indoors and out for more peaceful, comfortable spaces.

Convenient Control

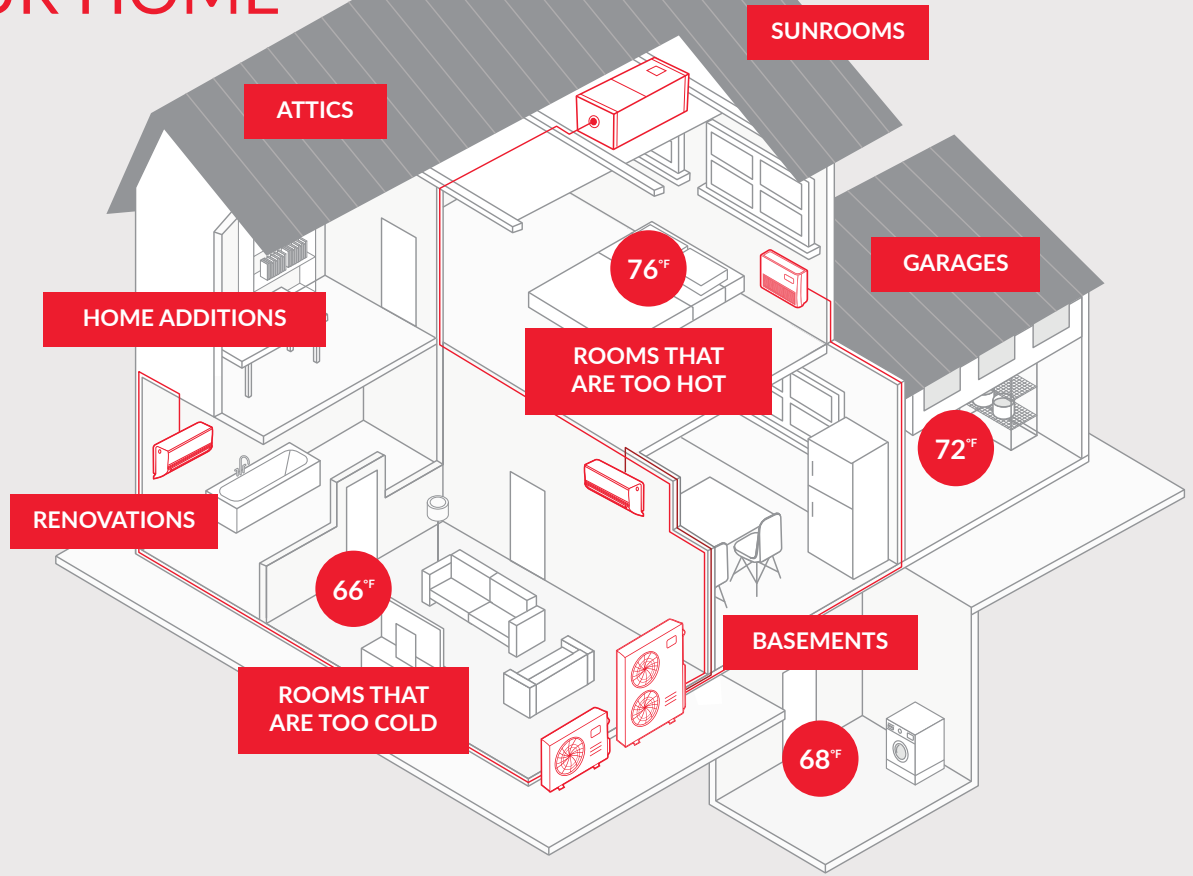

A temperature sensing, wireless remote controller—included with most indoor units—helps adjust and maintain ideal temperatures at your exact location in the room.

Limited Warranty

To the original owner, our Preferred Series heat pumps are covered by a 10-year parts limited warranty upon timely registration.**

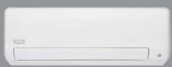

CUSTOM COMFORT FOR EVERY ROOM OF YOUR HOME

OPTIONS FOR EVERY SPACE & STYLE

Select the system that's right for you or find the perfect combination for whole-home comfort.

High Wall

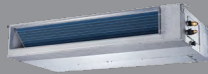

- Wall-mounted
- Whisper-quiet
- Sleep mode/ Eco mode

Floor Console or Underceiling

- Mounted near floor or under ceiling
- Slim profile
- Outside air intake to keep air fresh and clean

Ducted

- Recessed into wall or ceiling
- Maximum installation flexibility
- Improved ventilation

Ceiling Cassette

- Recessed into ceiling or under floor
- Discrete or hidden installation
- 360-degree airflow

Multi-Point Air Handler

- Connects to existing ductwork
- Replaces existing furnace
- Hidden from view

One-Way Cassette

- Recessed into ceiling
- Slim and compact
- Follow Me temperature sensor

Optional Wired Controller

- Wall-mounted
- 7-day programmable
- Customizable schedules

A FULL SPECTRUM OF COMFORT
