A HOLISTIC SYSTEM WITH THE IDEAL BALANCE OF BENEFITS

Performance in All Climates

Crossover systems deliver superior cooling up to 122° F, with a range of heating options to meet the needs of any climate, as well.

- **Low Ambient Heat Options**

For dependable heating down to -22° F

- **Auxiliary Heat Kits**

For fast electric heating when you need it

- **Electric & Gas Options**

To leverage gas heat in extreme temperatures

Efficiency

Our solutions leverage a range of advanced technologies to ensure consistent temperatures and energy savings in all seasons.

- **Inverter Technology**

For consistent climate control and reduced energy costs by up to 30%

- **Dual Fuel Capabilities**

To automatically switch between gas and electric power at set temperatures for peak efficiency

Versatility

With a slim-profile outdoor unit and versatile installation options, the applications for our Crossover Solutions are virtually endless.

- **Hassle-Free Retrofitting**

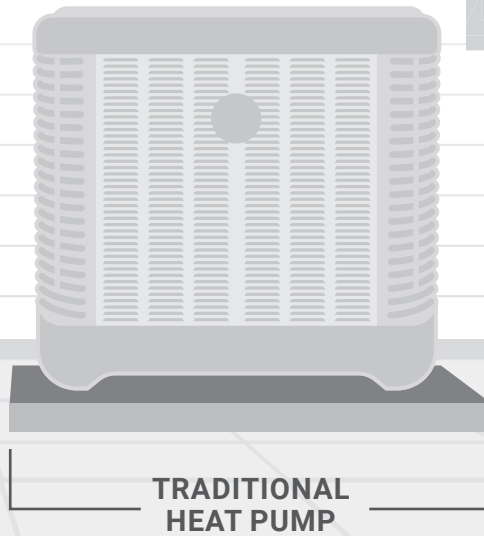

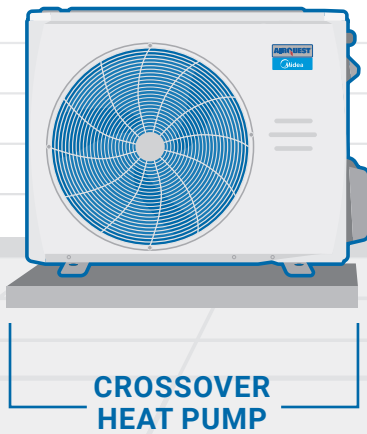

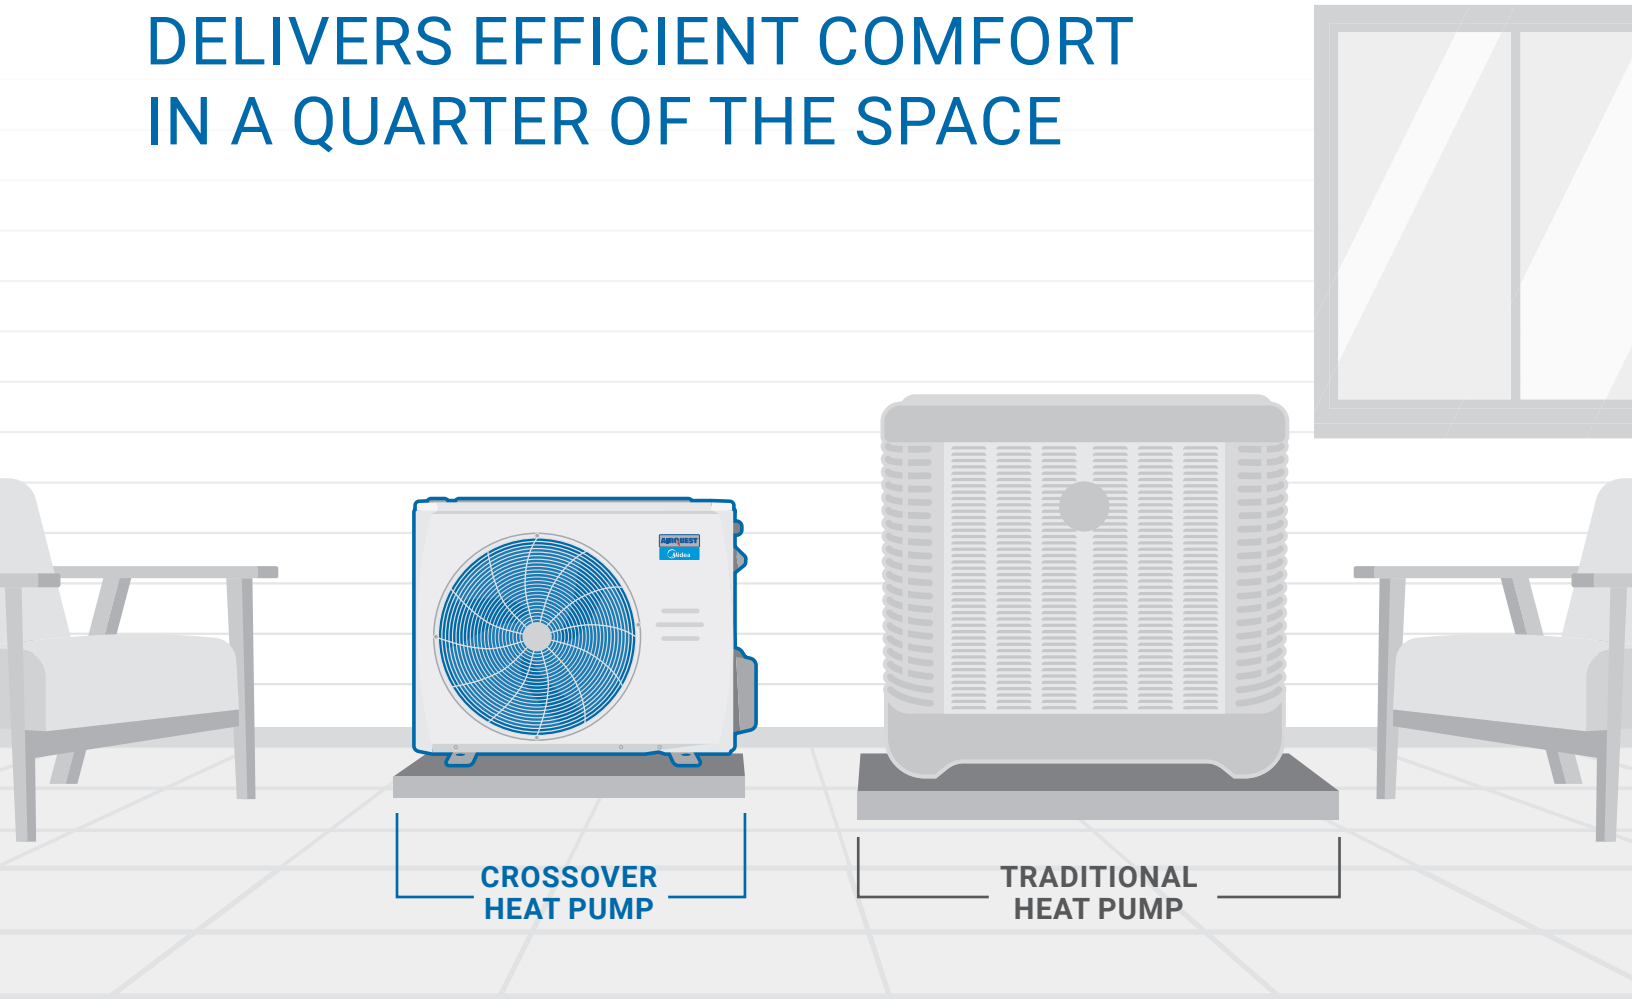

Easy integration with existing equipment and piping makes upgrading air systems a breeze

- **Flexible Temperature Control**

A built-in 24V interface means systems come ready to connect with your favorite brand of thermostat

A COMPACT OUTDOOR UNIT THAT DELIVERS EFFICIENT COMFORT IN A QUARTER OF THE SPACE

Designed With Dealers' Challenges in Mind

Simple Installation

Easily connect systems to existing line sets and control via third-party thermostats with no additional accessories or interfaces required.

Compact Design

Slim-profile outdoor units take up less space in trucks and warehouses compared to traditional top discharge units.

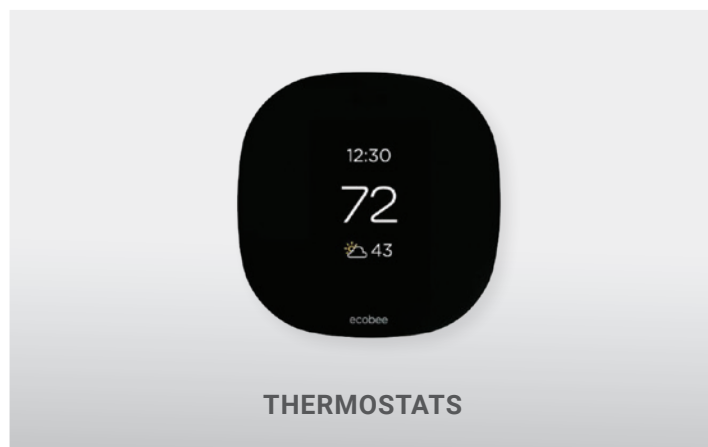

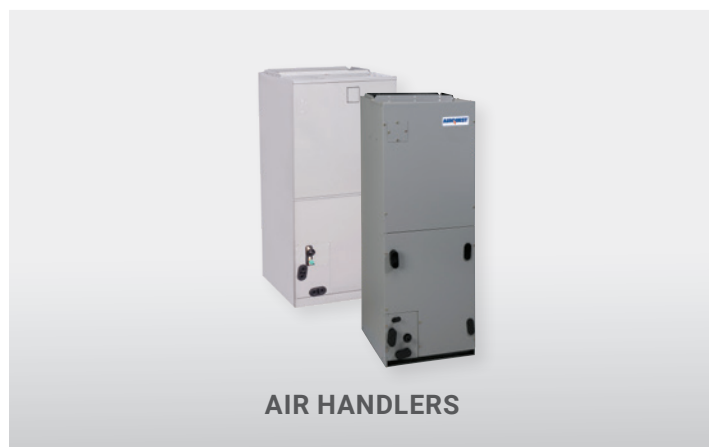

Easy Transport

Units are a light enough weight to be carried by a single technician.
