Integrated Saw Tooth Design:

Cuts through soft and hardened sealant for rapid fastener removal!

Deep Magnet = Less Cleaning

Sealants clog drivers. The deep magnet depth increases time between cleaning, resulting in more productivity.

Cleanable-Reversible Socket removes 1/4" and 5/16" fasteners

Two common sizes in the same tool, carry one driver instead of two!

Fast Socket Clean Out

Drive debris out of the cleanable-reversible socket using the drive side of the tool.
