Carlyle Compressor sells compressors to Carrier for use in their packaged units and to OEMs (original Equipment Manufacturers) that design and build finished systems. The system manufacturer is the expert on the system, including the application of our compressor. All questions, on either the packaged system or compressor in that system, should first be directed to the local Carrier distributor (for Carrier systems) or the OEM or its local representative (for other units).

Carlyle service replacement compressors, parts, and support are available through a wide distribution network. **Technical support and replacement compressors are provided through your local distributor.** Customer Service Representatives provide assistance in locating your nearest distributor.
